**CONNECTED BUILDINGS BY CONNECTED PEOPLE**

To ensure continued growth and success in the marketplace INBAC needs capable products and services, plus ongoing promotion, standardization, education and support to global product certification. Your participation in INBAC Association is essential to the ongoing success and expansion in the market for Building automation product solutions and smart services in India and around the world. We look forward to great accomplishments together in coming time and we're working hard for the prosperous, secure and open future to come.

**Let's co-create Smart Buildings, Sustainable Future!**

Best Regards,  
INBACers

# Highlights : INBAC in Spotlight

# About our Community

INBAC, the Leading Integrated Building Automation Community in India is a platform for all stakeholders of Building Automation industry to collaborate and create awareness around secure, smart, sustainable buildings.

Over the last 4.5+ years the INBAC community has continued to expand and develop. India is a consumer driven market. We all work to identify, satisfy and retain customers. At the same time, customers want to have safe, healthy, and comfortable environments, and value for money solutions.

INBAC is relentlessly working to bring “the need” and “the solution” together by leveraging building automation technology.

# Vision, Mission & Value

## VISION

Facilitating an ecosystem that supports efficient, safe, healthy and connected Buildings through open standards and protocols.

## MISSION

Driving building automation standards and interoperability through open, internationally accepted standards and protocols.

## VALUE

The objective is to have one standard nationwide and across nations and pass on the benefits to the end users, builders, consultants, industries and various government initiatives.

# TESTIMONIALS

**Joseph Martin**  
CIO, Hiranandani Group

“ The ecosystem of building automation stakeholders is incomplete without the (end users)developers, so I believe INBAC is the right forum for me to be in. You may develop great technology, unless it creates a social impact, unless you see the opportunity to improve the experience of the end users, it is not useful.

# TESTIMONIALS

“The challenges posed by the need for rapid growth in healthy living and working spaces can only be addressed through purposeful collaboration. The technology underpinnings of intelligent buildings and smart cities are important, but they cannot be developed and deployed in isolation. That is why ecosystem-wide community initiatives like INBAC are critical to moving forward. Let us hope the INBAC Wall project serves to initiate many interesting conversations and innovations.

**Andy McMillan**  
Industry Association, BACnet International

# TESTIMONIALS

“ INBAC can help us in ensuring that there is a time frame and we ( all stakeholders of Building Automation industry) deliver a fully functional system so that the automation and latest technologies like AI, IoT become meaningful

**Mathew John**

**Owner, Intelligent Building Consultants**

# VISITOR PROFILE

- Architects & Urban Designers.
- System integrator – Home & Office Automation

- Municipal, Government Department and Policy makers

- Building Owners & Facility Managers
